

DR'S LIGHT 2

Wireless Curing Light

Dual Functions

Enjoy Wireless Curing Light & Whitening Accelerator

1 Features of Dr's Light 2

-  **Various Curing Mode**
Turbo, soft start, normal, pulse, high and, pulse soft start are some of the curing modes available.
-  **High Power**
5 seconds is all you need to cure! However, you have full control of the intensity as well as curing time.
-  **OLED Screen**
Bright and clear OLED screen display that indicates various device settings.
-  **Timer Mode**
Automated timer will countdown and stop when appropriate.
-  **Large Battery Capacity**
Designed to provide longer lasting power per charge to help you save time and keep your devices running longer.
-  **Dual Wavelength LED**
Can polymerize for any kinds of material with dual wavelength (peak 405 and 460 nm)
-  **Wide Irradiate Area**
Can polymerize for wider area with 11 mm diameter.
-  **Adjustable Head Angle**
3 Adjustable head angles to reduce arm fatigue as well as a head pop-off feature that can be easily removed to incorporate alternate tips.

2 Specification

Handpiece (included curing light head)	Operation voltage	3.7V
	Peak wavelength	405nm & 460nm
	Measurement	Approx. 273 x 45 x 39 mm
	Weight	Approx. 114 g
Charger	Operation voltage	5V
	Measurement	Approx. 169 x 148 x 89 mm
	Weight	Approx. 170 g
Battery	Type	Lithium Ion battery
	Nominal voltage	DC 3.7V
	Measurement	Approx. 80 x 27 x 30mm
	Weight	Approx. 56g
	Disposable cover	Quantity
Adapter	Raw material	Polyethylene
	Input voltage	AC 100 ~ 240 V
	Output voltage	DC 5V 2A
	UL number	E333054

3 Alternate Tips (Optional)

FL head (Fluorescence)

Finding early carious, plaque, and etc.

Trans head (Trans Illumination)

Finding crack, proximal carious, and etc.

WA head (Wide Angle)

Whitening accelerator, wide surface orthodontic bracket bonding, and etc.

4 Program modes

Six Curing programs are available in this device.
